COMPANY INTRODUCTION

LedDesign was founded in 2006 by Shahar Altman and Shay Haji, pioneers in the LED lighting technology in Israel. The company was established with their joint vision of developing a company that specializes in the design, development and manufacture of a variety of lighting fixtures based on LED technology. Lighting fixtures that are suitable for use in an indoor, outdoor, underwater and salted aqueous environment.

LedDesign fastidiously and strictly maintains the quality of LED’s used, making use only of those that fully meet all required standards. The company develops and manufactures LED lighting fixtures based on the vast technical knowledge and experience gained and accumulated by the company, thorough understanding of the customers’ needs combined with the use of advanced tools for mechanical, optical and thermal design. They place strong emphasis on the implementation of the never ending and continuous improvement of various technologies.

The company uses only raw materials of the highest quality. Metal processing is carried out through the use of advanced computerized milling and cutting techniques (CNC). Once processing has been completed, the metal products undergo strengthening and hardening processes, which give a very high resistance to the lighting fixtures.

The company is highly capable of planning the infrastructures needed for the LED lighting in its smallest details at the highest resolution, the capability of designing and programing DMX systems, DALI and more ... as well as the ability and rich experience of integration with “smart home” systems, structure control systems and more.

LedDesign provides its customers, the lighting designers, architects and engineers, with a technological advantage as well as with an inexhaustible reservoir of knowledge and experience which is reflected in the quality and accuracy of the lighting fixtures illumination features, in the durability of its fixtures, as well as in the detailed infrastructures design, in the preparation and connection to smart home systems and to different lighting control systems.

45W/m.

**Light source**
Edison 2835 flexible SMD strip, CRI 80 or CRI 90, 133LM/w. Not dimmable, 3 LED line.

**Voltage**
24 VDC.

**Material**
Extruded matte aluminum.

**Cover**
Opal frosted diffuser.

**Surface Coating**
Natural anodized (paint optionality).

**Cable**
2 Wires red and black.

**IP Rating**
IP20 / IP54.

**Weight/m**
4020g/m.

---

**PR-74/77-H Linear profile**
High brightness aluminum profile with opal top for indoor and outdoor applications. Can be installed in cabinets, home ceiling, buildings and more.

---
